

EGS – The Ergonomic Guitar System

by

.strandbergGuitarworks*

Ergonomic Guitar Design

- Reduce weight
 - Carbon fiber composites
 - Light tonewoods (e.g. Swamp Ash)
 - Aluminium hardware
- Accommodate natural playing positions
 - Torzal twist neck
 - Fanned frets
- Accommodate different playing positions

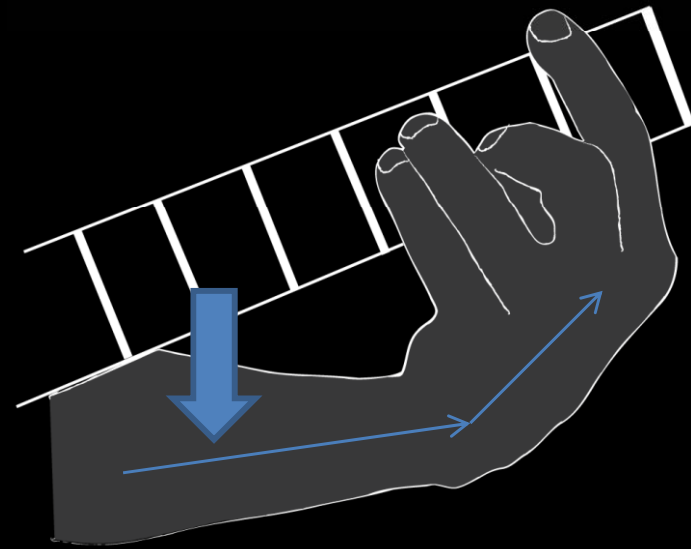

Weight

- One of the most important factors of ergonomic guitar design
- Save up to 600g on bridge & tuners with EGS
- Carbon fiber neck
- Carbon fiber back, exotic tonewood top

Wrist Position

- Neck is twisted to accommodate natural wrist angle
- Prevents Repetitive Strain Injury

Playing Positions

- Accommodates many seated playing positions

EGS Products

- EGS Bridge (release Nov 2008)
 - Single string tuner, packs of 6, 7, and 8
 - Floyd Rose[®] drop-in replacement tremolo
